SAFETY NOTES:

- **Before shutting any door**, look down at the keys - confirm you have them.
- **When you click the leash onto the collar**, triple check you are hitting the ***thick loop or ring*** on the collar.
- **Getting on the elevator**, make sure the dog is in the elevator completely and can't get startled and run back out.
- **Really wrap the leash tight around your wrist.**
- **Be careful standing too close to the street** - the dog can jump out into the street as cars are going by.
